I am a Multimedia Engineer from Autónoma de Occidente University. I have knowledge and experience in IT project development and I have the ability to lead, manage and analyze different aspects of them. I have worked in different areas of design for different multimedia projects, as well as experience in web development, software development, user experience evaluation, video game development, and others. Aditionally, I am passionate about 3D modeling, and animation for applications and / or multimedia projects.

Education

Universidad Autónoma de Occidente, Specialization in 3D Animation for Transmedia Environments
Graduated in 2022

Universidad Autónoma de Occidente, Multimedia Engineer
